

Search the Map using the "Find" tools

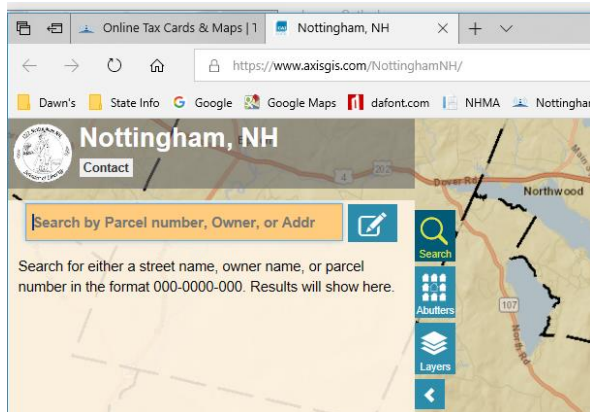

To find a parcel on the map, type the name of an owner, address, or parcel ID and click the appropriate button. As a general rule, "less is more" when searching. This means if you are not getting the desired result on your search, try entering less text for the search criteria. The results returned depend on a match existing in the tax assessor's database, which is subject to human error and variations in data entry.

Types of searches:

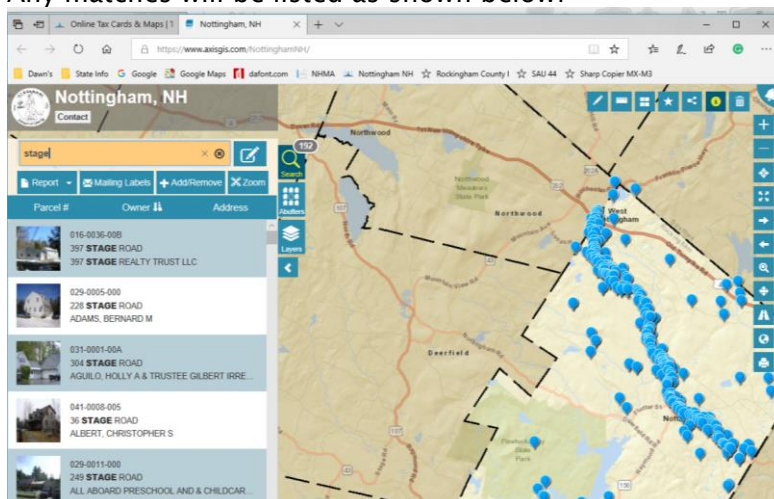

Owner: Search by owner's last name. In many client databases, the first name can be included after a space. Ex: Smith Joe

Address: Search on the street name. It is often better to search without the street suffix due to variation in abbreviation practices. Ex: Search "Oak" instead of "Oak Street" or "Oak ST".

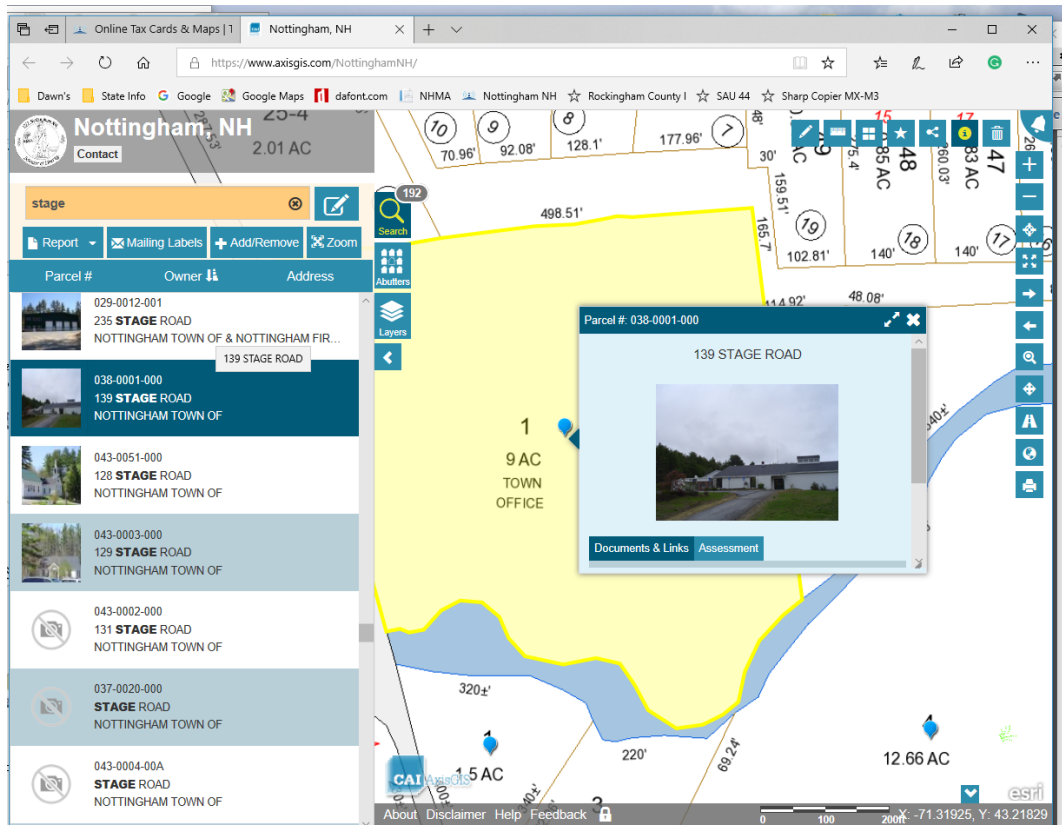

Parcel ID: Become familiar with the format of the town's Parcel ID to successfully find parcels by ID. To improve search results, padding with zeros is often implemented. It will often help to search for a common name such as "Smith" to view the format of the Parcel ID.

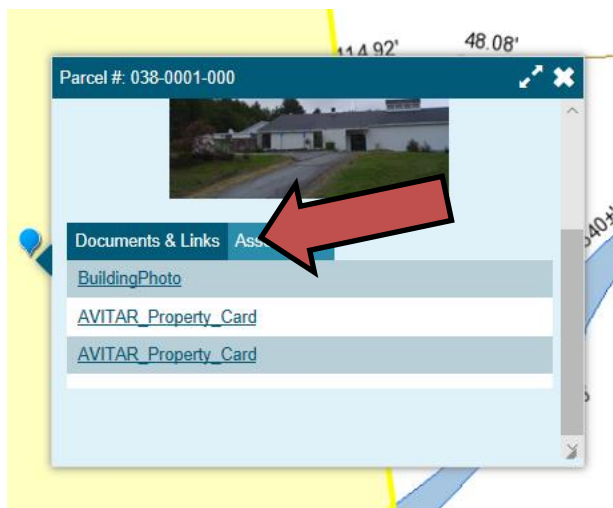

Any matches will be listed as shown below:

Click on the record of the desired parcel in the resulting list. The map will zoom to the parcel, and the property photo (if available) and Map Details will be displayed as shown below:

Select the Documents & Links Tab to print the Property Record Card.
