Re: PB Case #21-003-SIT, Map 69, Lots 8 & 10

Dear Ms. Defrancesco,

The Nottingham Conservation Commission (NCC) has concerns about noise especially during the spring breeding season.

Because the property lies over one of the larger aquifers in Nottingham and because of the large amount of traffic that will be crossing the bridge over the Pawtuckaway River to get to the property the NCC has concerns about oil and gasoline contamination that might impact the river which flows into the Lamprey River downstream. The Lamprey River is used downstream at times as drinking water for a few towns closer to Great Bay. We would like to see some provision to try to mitigate the possible contamination. Thank you.

Sincerely,

Samuel P.M. Demeritt. NCC Chair
